

# SAFETY ALERT: REPORTING

## Reporting Workflow

OSHA mandates that all work-related fatalities, in-patient hospitalizations, amputations and incidents involving the loss of an eye be reported promptly. Virginia Occupational Safety and Health (VOSH) follows the same reporting requirements to ensure statewide compliance. According to OSHA Standard 1904.39, these incidents must be reported either through electronic submission, by calling the nearest VOSH regional office, or by visiting in person. For full details on how to report a fatality or serious incident, visit the Virginia Department of Labor and Industry's website at: [Report A Fatality/Catastrophe | DOLI](#).

OWC Loss Control is always available to assist with the process. Please reach out to [DHRMRiskManagement@dhrm.virginia.gov](mailto:DHRMRiskManagement@dhrm.virginia.gov) for immediate assistance.
